## Polycrystalline Solar Module 72 Cell Series

### KEY FEATURES

#### 330W

Highest power output

#### 10 years

Material & workmanship warranty

#### PID Free

Certified by TUV Rheinland

#### 25 years

Linear power output warranty

- Positive power tolerance: 0-+3%
- Robust design: Certified to withstand up to 2400 Pa wind load and up to 5400 Pa snow load
- Proved high reliability built on dozens of projects
- Four busbar cell: Improve the efficiency of modules

### QUALITY WARRANTY

TALESUN guarantees that defects will not appear in materials and workmanship defined by IEC61215, IEC61730 and UL1703 under normal installation, use and maintenance as specified in Talesun's installation manual for 10 years from the warranty starting date.

### ABOUT TALESUN

Suzhou Talesun Solar Technologies Co., Ltd. is one of the world's largest integrated PV manufacturers. Its standard and high-efficiency product offerings are among the most powerful and cost-effective in the industry. With over 6 GW of modules installed globally, we are a leading solar energy company built upon proven product reliability and sustainable performance.

### PERFORMANCE WARRANTY

#### Polycrystalline Solar Cell Modules

- During the first year, TALESUN guarantees the nominal power output of the product will be no less than 97.5% of the labeled power output.
- From year 2 to year 24, the nominal power decline will be no more than 0.7% in each year; by the end of year 25, the nominal power output will be no less than 80.7% of the labeled power output.

ELECTRICAL PARAMETERS

Performance at STC (Power Tolerance 0 - +3%)				
Maximum Power (Pmax/W)	315	320	325	330
Operating Voltage (Vmpp/V)	36.8	37.1	37.4	37.7
Operating Current (Impp/A)	8.56	8.63	8.70	8.76
Open-Circuit Voltage (Voc/V)	45.2	45.5	45.7	45.9
Short-Circuit Current (Isc/A)	9.11	9.16	9.22	9.27
Module Efficiency ηm(%)	16.2	16.5	16.7	17.0
Performance at NOCT				
Maximum Power (Pmax/W)	232	236	240	243
Operating Voltage (Vmpp/V)	33.8	34.1	34.4	34.6
Operating Current (Impp/A)	6.88	6.92	6.98	7.04
Open-Circuit Voltage (Voc/V)	41.7	42.0	42.2	42.3
Short-Circuit Current (Isc/A)	7.38	7.42	7.46	7.51

\*STC: 1000W/m², 25°C,AM 1.5      \*NOCT: 800W/m², 20°C, AM 1.5, Wind Speed: 1m/s

MECHANICAL SPECIFICATION

Cell Type	Poly Crystalline
Cell Dimensions	156.75*156.75mm(6inch)
Cell Arrangement	72(6*12)
Weight	22kg(48.5lbs)
Module Dimensions	1960*992*40mm(77.17*39.06*1.57inch)
Cable Length	1200mm(47.24inch)
Cable Cross Section Size	4mm²(0.006sq.in)
Front Glass	3.2mm High Transmission, Tempered Glass
No.of Bypass Diodes	3/6
Packing Configuration (1)	27pcs/Pallet, 648pcs/40hq
Packing Configuration (2)	27pcs+4pcs/Pallet, 696pcs/40hq
Frame	Anodized Aluminium Alloy
Junction Box	IP65/IP67

OPERATING CONDITIONS

Maximum System Voltage	1000V/DC(IEC)
Operating Temp.	-40℃~+85℃
Maximum Series Fuse	15A
Static Loading	5400Pa
Conductivity at Ground	≤ 0.1Ω
Safety Class	II
Resistance	≥100MΩ
Connector	MC4 Compatible

## UP-GC42-2RE

Mechanical Characteristics		
	SI Units	US Units
Length	318 mm	12.52 inches
Width	181 mm	7.12 inches
Height	425 mm	16.73 inches
Weight	52.00 kg	114.6 lb
BCI Group Size		GC42
Cell Layout		0
Base Hold-Down		B0
Terminal Type		DT
 Terminal height: 18.5 mm – 0.73 in Bolt size: 5/16		

Electrical Characteristics	
Nominal voltage	2 Volts
C100 Rated Capacity (100h)	1700 Ah
C10 Rated Capacity (10h)	1300 Ah
Reserve Capacity @ 25A	2640 min
Reserve Capacity @ 75A	675 min

Operational temperature range: -20°C to + 55°C (always keep the battery charged at least 60% at temperatures below 0°C)

Charging Instructions at 25°C	
Daily charge	2.50V ± 0.05V
Float charge	2.20V
Equalize charge	2.60V ± 0.05V

- \* Do not install or charge batteries in non-ventilated premises.
- \* The charging is of special importance because both over and under charging will severely limit the life of the batteries. If the batteries will stay for an extended period without being used please ensure they are routinely checked, cleaned and fully charged before being stored.

### Battery temperature adjustment:

Reduce the voltage by 0.028V per cell for every 10°C above 25°C, increase the voltage by 0.028V per cell for every 10°C below 25°C.

Deep cycle batteries need to be equalized periodically. Actively used batteries should be equalized at least twice per year.

# Inversor Cargador y Regulador de Carga QUADRO 5000W 24V MPPT 80A

## EL EQUIPO **TODO EN UNO** PARA INSTALACIONES SOLARES.

El Inversor Cargador Quadro tiene 3 funciones principales:

- Un regulador de carga de 80A MPPT, que nos permite instalar cualquier tipo de paneles solares respetando los límites de voltaje.
- Un cargador de baterías de 60A de carga a 24V, con el que podrá cargar las baterías desde un generador o red eléctrica.
- La parte de potencia del Quadro es un inversor de onda pura de 5000W, con una punta de arranque de hasta 10000VA para cortos espacios de tiempo (durante 1 seg).

QUADRO 5000W 24V

## REQUISITO INSTALACIÓN

1 - Será necesaria que la conexión de las baterías al inversor se efectúe antes que cualquier otra conexión, de lo contrario podría causar fallo en el mismo. Primero conectar el cable en el terminal del inversor y por último sobre el borne de batería.

2 - No deberemos superar los 145Voc de voltaje desde paneles solares (para ello ver los valores del panel solar), dado que podríamos causar un fallo en el regulador de carga por sobrevoltaje.

## INTERIOR QUADRO

### Entrada y Salida 230V Alterna

Hay que respetar la serigrafía de los 3 conectores tanto de la entrada (AC IN) como de la salida de potencia (AC OUT) y siempre con el inversor apagado.

### Visión General de conexiones.

Aquí se muestran los bornes de baterías y la entrada PV de paneles, situadas entre los ventiladores.

### Display para Control

El Inversor dispone de una pantalla donde poder visualizar a tiempo real lo que está ocurriendo en la instalación.

## CARACTERÍSTICAS TÉCNICAS

### Regulador de Carga

Rango Voltaje MPPT	30 -115 V
Voltaje Máx Voc	145 VDC
Amperios Máximos	80 A
Consumo Stand By	50 W

### Cargador de Batería

Voltaje de Batería	24 V
Voltaje en Flotación	27 V
Protección Sobrevoltaje	30.5 V
Corriente Máx. de Carga	60 A

### Inversor

Voltaje de Salida (+/- 5% )	230 V
Potencia Pico ( 1 seg )	10000 VA
Eficiencia	93%
Tipo de Onda	Senoidal Pura

### Características Físicas

Dimensiones mm (Largo x Alto x Ancho)	180x310x475
Peso ( Kg )	12.5
Temperatura de Trabajo	0 - 55°C
Temperatura de Almacenamiento	-15 - 60°C

# ANNEX 2

## Performance of Grid-connected PV

### PVGIS estimates of solar electricity generation

Location: 41°35'24" North, 1°41'6" East, Elevation: 334 m a.s.l.,  
Solar radiation database used: PVGIS-CMSAF

Nominal power of the PV system: 1.0 kW (crystalline silicon)

Estimated losses due to temperature and low irradiance: 9.5% (using local ambient temperature)

Estimated loss due to angular reflectance effects: 2.5%

Other losses (cables, inverter etc.): 14.0%

Combined PV system losses: 24.1%

Fixed system: inclination=37 deg., orientation=4 deg. (optimum)
